Visualise Your Financial Future

Investment Modeling

Project your portfolio's performance across different market conditions, from bull runs to bear markets.

Real-world Value

Focus on what matters: your actual buying power in the future, not just nominal returns.

Crypto Integration

Seamlessly incorporate cryptocurrencies like Bitcoin and Ethereum into your long-term financial planning.

Inflation Impact

See how inflation might erode your purchasing power, and how different assets can help preserve wealth.

Powerful Simulation Engine

Input Your Parameters

Set your starting balance, monthly contributions, and time horizon

Adjust Your Allocations

Customize your mix of traditional and crypto investments

Run Monte Carlo Analysis

See thousands of possible futures based on historical patterns

Gain Actionable Insights

Understand your financial possibilities in plain English

Customize Your Financial Scenario

Intuitive Controls

Use simple sliders and dropdowns to adjust your financial inputs without the complexity of spreadsheets or financial jargon.

Key Parameters

- Starting balance
- Monthly contribution
- Investment timeframe
- Return expectations
- Inflation projections
- Crypto allocation percentages

Real-Time Updates

Watch your financial projection change instantly as you adjust parameters, helping you understand the impact of different decisions on your future wealth.

Simulation

SimuFi translates complex financial projections into actionable insights you can understand.

Visual Probability Cones

See your wealth's likely trajectory with clear confidence intervals showing best and worst scenarios.

Real Purchasing Power

All projections show inflation-adjusted purchasing power, not misleading nominal figures.

Visual Growth Trajectory

See your wealth's potential path with confidence intervals showing best and worst scenarios

Results In Plain English

"In 20 years, your real-world buying power could range from \$780,000 to \$1.25 million, accounting for inflation.

The Future of Investing: Simulation-Powered, AI-Executed

\$SIMU Token

Governance and access in one powerful token.

- Share in fund profits via staking
- Unlock premium simulations
- Vote on investment strategies

Own SimuFi. Guide the future.

Agentic AI Layer

Advanced AI that executes what it simulates.

- Analyses macro data and on-chain activity
- Runs thousands of simulations daily
- Executes trades based on expected value

GPT meets DeFi strategy

Fully On-Chain

Complete transparency in every decision.

- Smart contracts for treasury management
- All AI decisions publicly visible
- Optional privacy for enterprise users

Audit everything. Or fork it.

User Simulation Portal

Test before you invest.

- Try FIRE plans or ETH staking strategies
- Opt-in for AI-managed allocation
- Personal insights from collective data

Simulate before you stake.

Secure and Privacy-Focused

No Account Required

Run simulations without creating an account or sharing personal information

Local Processing

All calculations happen in your browser—your financial data never leaves your device

No Data Collection

We don't track your inputs or store your financial information

Open Source

Our simulation algorithms are transparent and peer-reviewed for accuracy

How SimuFi Works

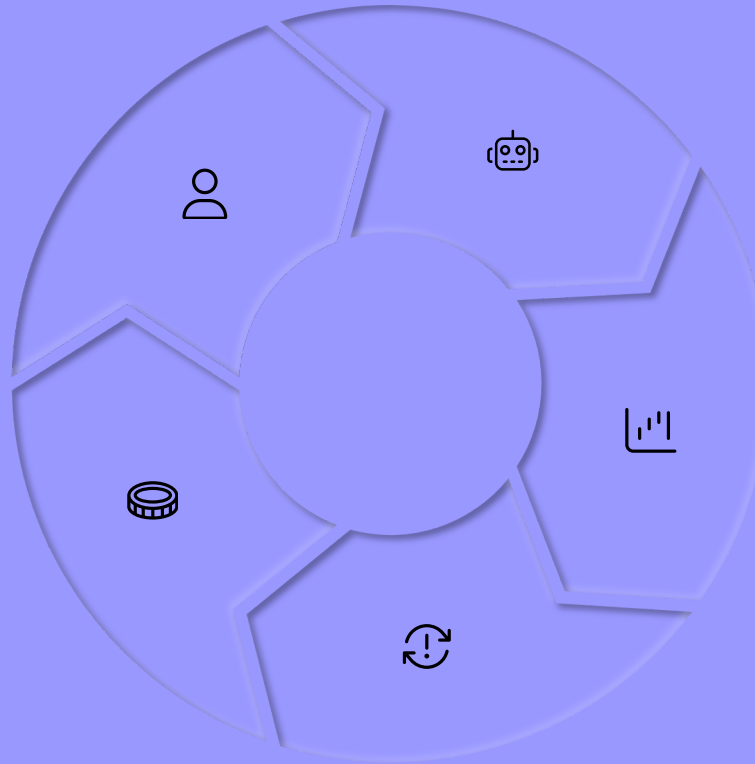

SimuFi creates a seamless value loop between users, AI, and token holders.

User Simulations

Users run financial simulations to visualise potential wealth trajectories across traditional and crypto assets.

Value Distribution

Fund profits flow back to \$SIMU token holders who stake in the ecosystem.

AI Analysis

Agentic AI processes simulation data to identify optimal investment strategies.

Strategy Execution

Users choose between SaaS guidance or joining the collective DeFi fund.

Performance Feedback

Real-world results feed back to improve future simulations and strategies.

This continuous feedback loop creates a self-improving financial ecosystem that benefits all participants.

What Our Users Are Saying

Financial Clarity

"SimuFi finally helped me understand how my crypto investments fit into my overall financial picture. The visualisations make complex concepts instantly clear." — Joshua H, Crypto Investor

Confidence in Planning

"I've always been intimidated by financial planning. SimuFi's approach removes the jargon and shows me exactly what I need to know." — Rice S, Government Employee

Decision Support

"The ability to quickly test different scenarios has completely changed how I make investment decisions. It's like having a financial advisor in my pocket." — Ben P, Legal Paper Filer
